Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 1, "the knife edges" lack positive antecedent basis, as no "knife edges" have been recited in either of claims 7 or 8.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10, 15-18, 22, and 23 of U.S. Patent No. 6,139,793 in view of Glazer et al (U.S. Patent No. 5,582,793).

The subject matter of the instant application is entirely encompassed by claims 1-10, 15-18, 22, and 23 of Vanderwal except for the specific limitations relating to the protrusions on the

Art Unit: 1744

wall of the pressure vessel. For example, see claim 6 of the instant application wherein it is recited "a plurality of protrusions carried on the wall of the pressure vessel". Such protrusions are not claimed by Vanderwal. However, Glazer et al discloses a similar method of treating waste material wherein vessel 204 includes protrusions 346, 356 which interact with paddles 328, 330 to enhance the cutting efficiency of the paddles. See col.1, lines 38-62 and col.12, lines 6-11. For this reason, it would have been obvious to provide protrusions on the interior of the pressure vessel of Vanderwal to interact with the knife edged paddles.
